

Year 3 and 4 Swallows Class Homework: Term 1 - 'Here Be Dragons'

Below are your homework activities for this term. Homework books should be returned on a **Monday** morning with spellings and times tables completed. Homework books will come back home by Wednesday. Please choose at least one topic homework to complete this term. You may choose from the options below or complete a project of your own linked to any of our areas of learning this term. Be creative! This will be due on **Wednesday 22nd October** so that we may share and celebrate in class.

English	Maths	Ideas for topic homeworks...
Read or share a book at home daily. Please record your reading in your reading diary. Your grown up should write in your diary at least three times a week. <i>Discuss what you have read with another person. What did you like? What didn't you like? Was there anything that puzzled you?</i>	Multiplication Tables Year 3 - Children should know and recall their 2, 5, 10, 3, 4, 8 times tables and related division facts by the end of year. Year 4 - Children should know and recall all tables up to 12x12 and related division facts by the end of the year.	'Here be Dragons' Complete a detailed drawing of your own dragon. Use labels and writing to tell us all about your mythical creature. Provide as much detail as you can so we can spot your dragon in the wild! 
Write 3-5 sentences using some of your weekly spellings. Please focus on correct sentence punctuation and letter formation.	We have a weekly tables quiz in different formats to check progress. Please use Times Tables Rockstars to practise. Your user name and password is in the back of your book. You may also use flashcards, sheets, board games to practise as well!	Archeologists dig for clues... Visit the Saxon Hoards in the Ashmolean Museum. What clues do artefacts such as these give us Ancient Britain? I wonder which other interesting artefacts you might find. Sketch some of the interesting things you find in the museum and tell us what you can find out from them.
Spellings are linked to the patterns we are revising/learning in class. Please see the list in your book for the week. There will be a weekly spelling check on a Monday.		States of Matter Explore how changing states can be an important part of cooking. You may find a recipe that involves freezes, heating, melting, cooling or more than one of these processes. Take some photos of your work or bring in the recipe to tell us what happened during each process.
