- ☐ Water

*Please note some people have food allergies.
Check with your setting before sending in food.

Many snacks marketed for children contain high amounts of sugar – always check the label before you buy.

Label	Amount of sugar (per 100g)	What it means
 Low sugar	5g or less	Best choice – tooth-friendly snack
 Medium sugar	Between 5g and 22.5g	OK in moderation – check portion size
 High sugar	More than 22.5g	Avoid or keep for occasional treats

Drinks: Low sugar = 2.5g or less per 100ml
High sugar = more than 11.25g per 100ml

Tip for parents: Always check the per 100g/100ml column on the label, not just the portion size.
